Management Health Solutions Mobile Supply Chain Software Released for iOS

Apple® Certifies @Par Application Suite for its Devices

Stratford, CT – November 15, 2016 – Management Health Solutions, Inc. (MHS) announced today that its @Par Distribution mobile supply chain solution has been released as a certified App for iOS devices on the App Store®. This suite of application modules manages inventory receipt, delivery, and replenishment through a mobile device and has been optimized for full support in the iOS environment.

“This certification marks a major advancement for our @Par platform, which is used by hundreds of hospitals to drive costs savings through supply chain automation,” said Brian Campbell, President & CEO, Management Health Solutions. “As healthcare organizations increasingly deploy iOS-based devices, @Par’s platform independent capabilities offer tremendous flexibility to meet our customers’ strategic IT objectives.”

This release furthers the company’s strategy to support the full range of Android™, iOS, and Windows®-based mobile devices. The software is available immediately from MHS on the App Store.
